

ON THE DRY SIDE

CENTRAL COAST CACTUS & SUCCULENT SOCIETY

OCTOBER 2017

OCTOBER SPEAKER OF THE MONTH

ALAN BEVERLY

Alan Beverly is our guest speaker of the month for October. Alan is currently a landscape contractor and an Aloe polyphylla propagator. He hails from our very own Cal Poly with an MSc. in Agricultural Plant Sciences, with his thesis on "The Seed Ecology of Aloe Polyphylla." He currently holds several professional certifications and his past work includes research in Sehlabathebe National Park, studying Aloe polyphylla, Peace Corps volunteer in Lesotho, high school science teacher, certified arborist, commercial cactus and succulent grower, propagator, traveler and naturalist, academic consultant, and more. In 1992, he introduced the Spiral Aloe to the nursery industry.

Alan's PowerPoint presentation will be, "Biology and Cultivation of Aloe Polyphylla," and he will bring some of his 1-gal plants for sale at a bargain price!!

DON'T MISS OUR NEXT MEETING!
SUNDAY, OCTOBER 8TH

OCTOBER PLANT OF THE MONTH: ARIOCARPUS

PLANTAE / CARYOPHYLLALES / CACTACEAE / CACTEAE / ARIOCARPUS

ARIOCARPUS

(greek, aria – a type of oak tree, karpos – fruit)

Description:

To paraphrase Edward Anderson's *The Cactus Family*:

Plants solitary or forming clumps, small, geophytic (A perennial plant that can propagate by underground bulbs or tubers or corms). Taproots large, fleshy, with an extensive mucilage (gelatinous substance) system. Stems compact, consisting of tubercles (a round nodule, small eminence or warty outgrowth) that in some species appear leaf-like. Ribs absent. Spineless. Areoles varying in their occurrence on the tubercles, as wooly grooves on the upper surface. Flowers borne at the wooly bases of young tubercles on the apex, open during the day, funnellform, varying in color from all white to yellow to (mostly) magenta. Distribution is northern Mexico and west Texas.

A. lloydii

A. fissuratus

Species:

Edward also writes that this genus is composed of six species:

- A. agavoides (latin, like an Aloe)
- A. bravoanus (named—not very eloquently—after Dr. Helia Bravo, Mexican cactophile)
- A. fissuratus (latin, cleaved and fixed)
- A. kotschoubeyanus (named after European Prince Kotschoubey who in 1840 paid 1,000 francs for one of the first collected plants, no word on how long it stayed alive)
- A. retusus (latin, blunt or dull)
- A. scaphirostris (latin, boat shaped tubercles)

Other sources list more or less than six species; the scientific naming of cacti and other succulents is still a wild and woolly practice.

Culture:

These plants naturally grow in very sunny northern Mexico and Texas where both sporadic summer and winter rains occur. According to living-rocks.com they are always found in calcareous soils but with varying degrees of clay content and friability with little humus. That these plants grow in nature in calcareous soils, however, should not imply that the growing medium for the hobbyist should be alkaline. Both alkaline and acid growing mediums will do these plants little good, a pH around neutral to slightly acid is ideal. Temperature wise, different sources state minimums of 30°f to 15°f with the lower number probably being more accurate depending on soil moisture and morning sun exposure. If grown in a greenhouse very good ventilation is required.

CONTINUED NEXT PAGE >>>

OCTOBER PLANT OF THE MONTH: ARIOCARPUS — CONTINUED

We grow our Ariocarpus in a mix of about one half pumice, one quarter planting mix and one quarter coir using “deep” (not shallow, to allow room for the tubers to grow downward) clay pots. Peat or sphagnum moss in the soils mix is not recommended. Our plants grow in sunny exposures and are watered about once a week during the Spring, Summer and Fall depending on the weather. We “feed” them every third or fourth watering. Since they grow outside (we live in Pismo Beach) they have to fend for themselves during the Winter with the rainwater the season provides; and we have not lost one plant in the last three years. They seem to be doing well and have gifted us with incredible flowers during the summer.

When we re-pot we sometimes plant the Ariocarpus’ “high” exposing some of the tuber. I’m sure the plant does not think this is great but since we live in a rather benign environment it does not seem to hurt them. As far as the aesthetics go: to each their own.

These plants are not for everyone – they are extremely slow growers, some grow to a maximum diameter of only two or three inches, don’t quite look like a cactus or other succulent and are difficult in some climates. But, we think the form of these plants is incredible. And when an *A. kotschoubeyanus* opens its white and magenta flower that is larger than the plant itself, on a late summer afternoon – it’s just icing on the cake.

SEPTEMBER CCCSS GENERAL MEMBERSHIP MEETING RECAP

At 2:00 p.m. on Sunday, September 10, 2017, President Loring Manley called the meeting to order. The club has been considering buying our own sound system, and the meeting featured a system that was rented for evaluation. It was a big improvement, and people in the back were able to hear. Loring thanked the members who brought goodies for the break and welcomed several first-time visitors. All received a succulent.

Announcements:

Barbara Brooks, Membership Chair, reminded people to silence their cell phones during the meeting. It should also be noted that talking in the audience while our program is being presented is distracting and insulting to the person speaking. This is the single most frequent thing that people complain about. Please be courteous. Barbara reminded members that September is the cut-off for membership renewal. Members who have not renewed will no longer receive the newsletter and won't be eligible for field trip discounts or member-only workshops.

Mary Peracca announced that she will be participating on San Luis Obispo County's annual Open Studios Tour on October 14 and 15. Other member potters also participating include Maggie Wagner, Charles Varni and Richard Rowe. Please confirm exact dates and locations where members will be selling their creations.

Susie Hubbard had a Garden Gathering scheduled for Sunday (September 17).

Kathie Matsuyama invited members to view the artwork that is being sold in conjunction with Just Looking Gallery. Kathie also announced that donations continue to be collected for Penny Pines, which supports re-foresting of national forest lands devastated by fire. Our next contribution will be made in honor of Battalion Chief Gary Helming who recently was killed in an automobile accident as he was returning to the Central Coast from fighting a fire in the Sierra National Forest. In the future, the donation jar will be on the "ASK ME" table where Kathie and Gene Schroeder will be answering questions about your cacti and succulents. You will also be able to sign up for the Garden Gatherings and field trips at this table.

A number of members brought in Brag Plants, for which they received a raffle ticket. There was a great article in the last newsletter about the Plant of the Month, Raphionacme, a geophyte that exists below ground level when it is dormant. There is no evidence of the plant until it rains again. It is attractive and is not subject to rot. When the leaves turn yellow and fall off, let it go dormant and stop watering. After the raffle plants were discussed, the group broke for a break.

Tom Glavich gave us a presentation on Haworthias and their succulent relatives. They are in the aloe family and aloes, Haworthias and gasteria can hybridize with each other, resulting in endless varieties of these succulents. After a discussion of the various methods for creating new plants, Tom showed us examples of many varieties of Haworthias and their relatives.

Following our featured speaker, Harry Harlow conducted the raffles. The meeting adjourned, the room was cleared, and the plant exchange was held.

Respectfully submitted,
Carol Harlow Moss, Secretary

SEPTEMBER CCCSS BOARD OF DIRECTORS MEETING RECAP

Officers in attendance: President, Loring Manley; Vice President, Carol Mortensen; Secretary, Carol Moss; Treasurer, Kathy Goss; Newsletter Editor, Mark Woods; Hospitality, Pat Gilson; Large Member, Bill Findley; and Past President, Ken Byrne. Also in attendance, CSSA Representative, Rob Skillin; Membership, Barbara Brooks; and member Claudette Rettig. Officers absent were Terry Skillin and Natasha Erickson, Members-at-Large. Librarian Ann Byrne was also absent.

The subject of club insurance was discussed. Kathy Goss distributed a handout of considerations. Loring suggested that we get directors and officers insurance through CGCI at a cost of \$1,000 for \$1,000,000 of coverage, which was unanimously approved. E&O insurance was also considered, which we can obtain through a broker for \$279. Kathy and Terrie Leivers will follow up.

The public address system was discussed and it was agreed that the rented system we used today was excellent. Audience members were able to hear. The system was top-of-the-line, at an approximate cost of \$1,200 (there are various options) but it is probably more than we need. Bill agreed to contact the Odd Fellows Hall Manager, Tim, about the possibility of renting a system that is used by others in OFH, but when Bill spoke to Tim later, it was disclosed that that system is no longer available. OFH may buy a system, but not in the near future.

CSSA Convention support was discussed. Loring proposed that the organizing committee be chaired by Terrie Leivers, with assistance from Ken Byrne, who will provide continuity. Although Terrie was not at the meeting, she had agreed beforehand to be the chair. Gunnar and other CSSA personnel are coming to San Luis Obispo on Saturday, September 30, to check out possible venues. Terrie and Ken will meet with them at 9:00 a.m. and Loring will join them if possible.

Rob proposed that the inventory of CCCSS assets be added to the Standing Rules. It was noted that the Standing Rules can be modified by the Board of Directors, but changes to the Bylaws must be approved by the general membership. The motion to add the inventory to the Standing Rules as a new Section 8 was made, seconded, and passed unanimously. Rob will take care of accomplishing this.

Kathy Goss presented the Treasurer's report and said that Maggie has not heard back from the IRS in response to our tax problem. Kathy and Terrie are putting together a list for document retention, which will be added to the Standing Rules as Section 9. Rob is going to update the membership rosters from 2006-2011 and add them to the membership spreadsheet so that all membership information exists in one document.

Other items discussed included authorizing Pat to again purchase turkey and ham from Popolo's, but to let them know that the meats last year were too dry; Pat will ask them to correct it. In the future, the Penny Pines contribution jar will be placed at the Ask Me Table and will not be passed. The calendar was discussed, and Carol Moss agreed to send a copy of the last calendar she prepared to all board members for their suggestions on what the calendar should include. The calendar will be discussed again in January. Purchase of a defibrillator was discussed and it was agreed that we would not purchase one.

In the week prior to the meeting, Secretary Carol Moss received an email from a firm that represents customers with online images. A copyrighted image was discovered by them in a newsletter on our website, and they demanded payment or negotiation from us. As a precaution, all newsletters have been temporarily removed. It was decided that action would be deferred until the hard copy arrived. The hard copy of the letter was subsequently received by Rob Skillin, and the board discussed how to move forward via an email discussion. After discussion, a motion was made by email authorizing Loring Manley to reach a settlement with the company. He wrote a letter explaining our situation. As of this writing, no response has been received.

SEPTEMBER BOARD MEETING RECAP – CONTINUED

In the week prior to the meeting, Secretary Carol Moss received an email from a firm that represents customers with online images. A copyrighted image was discovered by them in a newsletter on our website, and they demanded payment or negotiation from us. As a precaution, all newsletters have been temporarily removed. It was decided that action would be deferred until the hard copy arrived. Rob Skillin subsequently received the hard copy of the letter, and the board discussed how to move forward via an email discussion. After discussion, a motion was made by email authorizing Loring Manley to reach a settlement with the company. He wrote a letter explaining our situation. As of this writing, no response has been received.

Because of situations that arise outside of regular meetings that are sometimes discussed via email, such as the copyright issue which was resolved that way, it was requested that any communications that affect the club or its activities be copied to the president and the secretary so that such actions can be documented. Please use the BOD mailing list previously distributed and make sure the subject line is correct. Use common sense when “replying to all.” Lastly, any proposed changes to the Bylaws should be presented at the November meeting.

The meeting adjourned at 6:30 p.m.

Respectfully submitted,
Carol Harlow Moss, Secretary

CCCSS BULLETIN BOARD

T-Shirts and Books For Sale at the Next Meeting

CCCSS Member-At-Large Natasha Erickson will have a table set up at our next meeting, selling books on cactus and succulent cultivation (see book listing and descriptions on the next page), as well as beautiful t-shirts from our previous show and sale, and other CCCSS “swag”. She will also have the “Penny Pines” donation jar for anyone who wants to contribute to our reforestation efforts.

Also Available at Monthly Meetings: ‘Ask Me’ Table

A brand-new resource is now available for our CCCSS club members. At each monthly meeting, you can bring your questions about cactus and succulents to the ASK ME TABLE. The table will be capably staffed by our venerable expert Cactophile, Gene Schroeder. Gene has never a met cactus he didn’t like! (And many succulents as well). Assisting Gene will be Succulentophile Kathie Matsuyama. Please stop by their table, conveniently located next to the Library table, to ask your burning cactus and succulent questions. Please do not bring any diseased plants to the meeting! We don’t want to infect healthy plants with any bugs, viruses, etc. Take a good photo and bring that instead. Thanks, and looking forward to seeing you at the **ASK ME TABLE!**

CCCSS History Project

Kathie Matsuyama has undertaken the fun project of preparing a history of CCCSS. The history will discuss the formation and early days of CCCSS, compile statistics on a wide variety of CCCSS topics, and create an archive for CCCSS photos. Do you have information regarding the formative early days? Do you have great photos of CCCSS events? If so, please contact Kathie Matsuyama at luvbigdogs@earthlink.net.

Currently, Kathie is looking for CCCSS Newsletters from:

2005: February, May, June, July and December

2006: January

2007: January, February, March, April, August and October

2008: May

If you have any of these old newsletters, please contact Kathie at luvbigdogs@earthlink.net. Thank You!

CCCSS GARDEN GATHERINGS

A very **BIG THANK YOU** to Susie Hubbard for her fabulous Garden Gathering. A full house of Garden Gatherers, including some waiting-list additions, met at Susie's house on a perfectly warm late September day. Everyone was WOWed by Susie's gorgeous garden and exceptional eye for design detail. Her groupings of like-colored pottery, and her unique incorporation of "found" items in stunning ways show that Susie really likes to have FUN in her garden! That Susie spends a lot of time "playing" in her garden is obvious—her plants are perfectly grown! I'm sure all who attended will agree that although Susie's garden is small, it is packed, packed, and more packed with wonderful things to see!

Have you attended one of our CCCSS Garden Gatherings this year? If not, you don't know what you've been missing!

What are "Garden Gatherings"? Our CCCSS club is large, and it's sometimes hard to connect with other cactophiles at our huge meetings. "Garden Gatherings" are a chance for members to meet club members in a fun, casual garden setting. The social get-togethers include food and a tour of the member's garden and may also include displays and demonstrations.

Garden Gathering participants must be CCCSS members. Sign-up sheets will be available at monthly club meetings. The host decides the number of guests. If too many people sign-up, participants are chosen by lottery. Potential hosts will be guided through the process of pre-planning and event organization. We include full-service day-of-event support.

Please don't hesitate to sign up because you have a weed or two in your garden, we all do! And don't worry if an element of your garden is not cacti or succulent-related. The only thing you must have is a desire to share what you do in your garden and a willingness to host.

We are currently looking for hosts for future Garden Gatherings for November and December 2017. Sign-ups for 2018 are also underway. Please let us know if you are interested! Contact Susan Ross at susanrosscra@yahoo.com, or Kathie Matsuyama at luvbigdogs@earthlink.net.

BEAUTIFUL ART FOR SALE!

Available at our next meeting, we will have two sizes of this gorgeous print for you to purchase. The art was done by Steve Thomas for the Just Looking Gallery at 746 Higuera Street, Suite 1, San Luis Obispo, CA 93401 (805.541.6663). The amazing and wonderful folks at the Gallery have offered the art to CCCSS as a fundraiser. The profit from every piece of art sold by CCCSS goes to CCCSS!! Thank you Ken McGavin and Ralph Gorton for your kindness and generosity!

Prices including tax:

12" x 18"

Framed Print:

\$120

24" x 36"

Print on Canvas:

\$420

Orders will be taken at the club meetings; cash and checks only please.

Your print will be ordered from Just Looking Gallery and delivered to you at the following club meeting.

For more information, contact Kathie Matsuyama at luvbigdogs@earthlink.net.

BOOKS FOR SALE AT THE OCTOBER MEETING

Your purchase of any of the following books supports our ability to buy other books for our CCCSS library—*thank you!* The following books (some in very limited quantities) are available for purchase (cash or checks—no credit cards) at our next meeting. All prices include tax.

***Succulents for the Garden* by Attila Kapitany and Rudolf Schulz**

The authors show amateur gardeners what type of succulents can be used in the most amazing different types of garden environments. Areas covered are: seaside gardens, hillside country farmlets, arid inland gardens, hillside country gardens city courtyards, suburban nature strips, nature's garden and more. Recommended plantings of different species are given, giving flower color, shade tolerance, pot suitability, indoor, plus outdoor planting in warmer climates, height, spread, more. Echeverias, sedums, crassulas, senecios, yuccas, aloes and many more are detailed. 189 color photos, 95 pages, 7-1/4" x 9-3/4", softbound, w/heavy color cover.

This book is out of print and will not be reprinted. ONLY 4 COPIES LEFT!! Price is \$26.00.

***Aloes & Agaves In Cultivation* By Jeff Moore**

Jeff Moore's second book was released in June, 2016. Jeff takes you on a visual tour of aloes and agaves in cultivation, highlighting both the common and some of the more rare specimens, with pertinent information and growing tips gleaned from years of experience. Hundreds and hundreds of color photos (almost 1,000), with some of the best information on culture, care, and history of these wonderful plants. A huge book at 335 pages, 10" x 10", softbound.

ONLY 2 COPIES LEFT!! Reasonably priced at \$40.00.

***Under the Spell of Succulents* by Jeff Moore**

A brand new book with exquisite color photos—covering the full spectrum of cultivated succulents and how we engage with them—collectors, growers, landscapers, container gardening and more! 230 pages, with over 800 color photos, 8" x 10" softbound with a glossy cover.

A beautiful book at an extremely affordable price.

ONLY 2 COPIES LEFT!! Price is \$32.00.

***Succulent Success in the Garden* by Attila Kapitany and Rudolf Schulz**

Authors show how succulents can be used in the most amazing ways in garden environments: seaside gardens, hillside country, farmlets, and inland gardens, plus city courtyards, suburban nature strips and more. Recommended plantings of different species are given, showing flower color, shade tolerance, pot suitability, indoor/outdoor situations, and height, spread, more. Echeverias, sedums, crassulas, senecios, yuccas, aloes and many more are detailed and described. 303 color photos, 103 pages, 7-1/4" x 9-3/4", softbound w/heavy color cover.

This book is out of print and will not be reprinted. Price is \$26.00.

2017 CALENDAR OF EVENTS

Events for neighboring cactus and succulent groups in California:

- **October 14-15**
Bakersfield Cactus & Succulent Society Show & Sale
Saturday 10am-5pm, Sunday 11am-3pm
St. Paul's Church, 2216 17th St, Bakersfield, CA 93304
Info: 661-831-8488 | www.bakersfieldcactus.org/
- **October 28-29**
Palomar Show & Sale at San Diego Botanic Gardens
Info: hciservices@gmail.com | www.palomarcactus.org
- **November 4-5**
San Gabriel Cactus & Succulent Society Show & Sale
Saturday/Sunday 9am-4pm
LA County Arboretum 301 No. Baldwin Ave, Arcadia, CA
Info: Manny Rivera or John Matthews 661-714-1052 | www.sgvcss.com

2017 CCCSS HOLIDAY POTLUCK IS SUNDAY, DECEMBER 10TH

The Holidays are coming!

We have only 2 meetings before our annual holiday potluck. Due to room size, the club can accommodate 150 people only. Seating is on a first-come basis, so please get your signup sheet to me as soon as possible.

The signup sheet is on the following page.

Please complete and return it to me. If you have any questions, my email is hupt74@aol.com or please call me at **805-481-5596**.

Thank you!

Pat Gilson

Hospitality Chairperson
